NRO REVIEW COMPLETED

2 April 1969

MEMORANDUM FOR: ABM Committee Members

SUBJECT : Meeting Notice

1. On 11 April 1969 at 1000 hours there will be a meeting of the ABM Committee in Room 7D64. The agenda for this meeting is as follows:

- a. Discussion of the Network and the Interim Report, attached, describing the Network. Particular attention will be focused on the form of the Network, the relative values, and the desired accuracies. Possible extensions to include the impact on relative value of less than desired accuracy and the impact of the existing data base will also be discussed.
- b. Status report on collection system capabilities. Attached is a list of the collection systems currently being considered; the organization handling each system is indicated. Addition to or deletions from this list will be discussed.
- c. Status of analytical techniques. Short descriptions will be given of the analytical processes used in the ICBM study and the ELINT study. Possible modifications or extensions that may be particularly useful in the ABM study will be discussed.

2. It would be very helpful if the members could come to the meeting prepared to comment on the attachments and with proposals as to the distribution appropriate for the Interim Report.
